Prior-Experience

EXPERIENCE

SpiceBlue - Junior Backend Developer (6 Months)

Projects Worked On Sloovi Outreach, All Time Design

Description

Sloovi outreach is a sales engagement platform that sends automated cold emails to prospects, sets tasks to engage with prospects via Voip and social media with its own customer relationship management

All time design is a graphic design service subscription platform for which catalogues all the interactions that take place between the customers and support team

Talent500 - Software Engineer-I (8 Months)

Projects Worked On Talent500, Canvas

Description

Talent500 is a remote candidates hiring portal where suitable jobs are discovered using AI insights on candidates profile and helps to get hired seamlessly.

Canvas is an advanced applicant tracking system for recruiting candidates

Freelance - Backend Developer (3 Months)

PROJECTS

Blog Application - Web Development

The Application has a login system which gives access to the users to DO CRUD operations.

The Backend with Python (*Flask Framework*) . The Frontend of the application is made with HTML, CSS and Bootstrap.

Hand Cricket Game

- Using Hand Gesture Recognition- Game

The Game is built in python backed by computer vision libraries. It can predict the hand gestures from zero to six which will help the core of the game to play without the need of mouse or keyboard against a computer.
